

ThreatSwitch

Why ThreatSwitch? Cut compliance cost. Protect what matters most.

As an executive responsible for a cleared security program, you can't afford lapses. They put your IC or DoD contracts, your people, and national security at risk. You also can't afford to make hasty investments, and a traditional security compliance software or intricate network of spreadsheets may end up costing you more in terms of fees and labor. We've broken down the bare facts as you carefully consider which compliance solution is best for your team.

See below for details and see page 2 for pricing.

A team of Lean Six Sigma black belts found that ThreatSwitch significantly cuts the time required to complete crucial security actions.

Whats your return on investment?

With our turnkey services, you'll never pay for training support, software updates or hidden fees.

Reduce cost
per cleared employee
by \$1,000/year.

Lower headcount
and resource reallocation.

Use an integrated system
accommodating new
security guidelines.

“ Having used other solutions we found ThreatSwitch to be the best for ease of use, availability, pricing, and frequent updates that addressed requested enhancements. ”

—Chuck Helton, Director of Security for Belcan

ThreatSwitch is the future of security compliance management. Our software increases visibility, and enhances collaboration while cutting cost.

Access benefits enjoyed by other leading industrial security programs:

 **Zero dollars wasted**
on your employee's time.

 **No expensive software updates**
to accommodate new security guidelines.

 **No lapses**
that can lead to costly penalties.

 **No training**
or other hidden fees.

Our straightforward pricing model is based on the number of cleared employees in your company.

\$9.00-\$13.50
per employee per month (if paid annually)
